# Ponderosa Pine Scenic Byway Management Plan

**Michelle DeBard, Elise Thiel, Brian Crowley**

## Introduction

The Ponderosa Pine Scenic Byway extends along Highway 21 from Boise to Stanley. Accompanied by the U.S. Forest Service’s Wildlife Viewing Guide, the byway offers visitors close access to rare vegetation and wildlife in the Boise and Sawtooth National Forests, along with historic Idaho City and the Sawtooth Mountains. The guide features eighteen sites where you can explore the region’s unique wildlife habitats.

## Goal

Our primary goal was to provide visitors with more information specific to the Wildlife Viewing Guide, in order to foster a more immersive, interactive, and seamless experience for those utilizing the guide while traveling the Ponderosa Pine Scenic Byway.

## Project

We created a detailed management plan that encompassed all of our suggestions for improvement. The management plan will serve as a guide for the Forest Service as they work to implement these interpretive materials that will supplement the Wildlife Viewing Guide.

## In the Future...

It is our hope that these changes will greatly enhance visitors’ experiences with the wildlife and landscapes while traveling along the Ponderosa Pine Scenic Byway. We are providing the first steps towards bringing the Wildlife Viewing Guide to life!

## Site #15: Proposal archetype for all signs in byway.

- Site #15: 3-panel kiosk could be utilized fully.
- Site #10: Out of date info & needs full make-over.
- Site #5: Signs needs to be reprinted.
- Site #12: Most signs need physical repairs.
